The Company, through several of its subsidiaries, is directly involved in the manufacture, possession, use, sale, and distribution of cannabis in the recreational and medicinal cannabis marketplace in the United States. Local state laws where the Company operates permit such activities however, investors should note that there are significant legal restrictions and regulations that govern the cannabis industry in the United States. Cannabis remains a Schedule I drug under the United States Controlled Substances Act, making it illegal under federal law in the United States to, among other things, cultivate, distribute, or possess cannabis in the United States. Financial transactions involving proceeds generated by, or intended to promote, cannabis-related business activities in the United States may form the basis for prosecution under applicable United States federal money laundering legislation.

While the approach to enforcement of such laws by the federal government in the United States has trended toward non-enforcement against individuals and businesses that comply with recreational and medicinal cannabis programs in states where such programs are legal, strict compliance with state laws with respect to cannabis will neither absolve the Company of liability under United States federal law, nor will it provide a defense to any federal proceeding which may be brought against the Company. The enforcement of federal laws in the United States is a significant risk to the business of the Company and any proceedings brought against the Company thereunder may adversely affect the Company's operations and financial performance.
